Lahore Pakistan

Summary

A driven, determined, open-minded, creative and successful Software Developer with a strong sense of dedication and commitment, with over **5** years of progressive experience in mobile application Development and design field. Tenacious in creating compelling designs.

Skills

React Native, React.js, JavaScript, TypeScript with Es6, Node.js with Express.js, MongoDB, Redux, GitHub, Gitlab & Bitbucket, Jira, Slack, Asana, Notion.

Experience

Mobile App Lead | React Native

ViralSquare (Oct 2021 – Present)

- Used expertise in React and React Native by promoting better component lifecycle-practices, leading to a 23% increase in turnaround speed and 100% adherence to deadlines.
- Used critical thinking to break down problems, evaluate solutions and make decisions.
- Reduce development time by 25% by integrating REST API endpoints to enable smooth data movement across several platforms.
- effectively performed with other teams and senior management to maintain project mechanism and ensure successful project outcomes and 35% decrease in app load time.
- Successfully deployed applications on both Google Play and Apple App Stores.
- Demonstrated technical leadership by mentoring junior engineer on best practices for software development and engineering processes.

Senior React Native Developer

Tryngo Technology (May 2020 – Oct 2021)

- Revamped React Native codebase to enhance stability, reduce memory consumption, and improve overall user experience, resulting in increased mobile app performance.
- Conducted accurate testing and debugging of all React Native components before deployment, ensuring that delivered projects met all functional requirements within stipulated timelines, resulting in an average customer satisfaction rating of 85% for projects completed during tenure as a developer.
- Assisted in developing test plans for new functionality prior to release and provided assistance to the QA team during testing of releases when required.
- Helped to deploy the Apps on Google Play and Apple App Stores.
- Utilized strong analytical and problem-solving skills to develop effective solutions for challenging situations.
- Integrated REST API endpoints to enable seamless data transfer across multiple platforms, resulting in a 25% Reduction in development time.
- Developed reusable UI components based on custom design specifications, optimizing coding efficiency and maintaining high-quality standards throughout the project duration, leading to a 20% Reduction in bug count.

React Native Developer

Techndevs (Jun 2018 – May 2020)

- Developed comprehensive project plans for creating scalable, usable, and high performance React Native apps from scratch.
- Proficiently created front-end components using JavaScript / Typescript and popular libraries like Redux.
- Created pixel-perfect designs and solutions for complex applications, reducing application load time.

Projects

Tabo Booking System (<https://play.google.com/store/apps/details?id=com.tabo>)

- **Role:** Front-end Developer
- **Competency(s):** React Native, GraphQL

Project Description:

- Integrated graphql in the project. Integrated RESTful APIs with axios. Given the Support to the mobile app in terms of publishing new versions to stores. Tabo helps you reserve seats or tables, having the appropriate information about the place whether it's a beach, pool, restaurant terrace or club.

E- MENEW Rider (<https://play.google.com/store/apps/details?id=com.emenewrider>)

- **Role:** Front-end Engineer
- **Competency(s):** React Native

Project Description:

- E- MENEW Rider is a complete product delivery management solution for riders allowing them to receive, acknowledge and deliver orders using the in-app features. The application also provides the riders with the best route to their destination.

SpotSwap (<https://play.google.com/store/apps/details?id=com.spotswap&hl=en&gl=US>)

- **Role:** Front-end Engineer.
- **Competency(s):** React Native

Project Description:

- Spot Swap will be a mobile app that connects those who are exiting a parking space with drivers who are in need of parking in that area. Users will create a profile that includes their information as well as details about their car. At one end user will create parking spot and on the other end user's can avail that parking spot. After the arrival of other user parking will by transfer to the arrived person after the payment process.

Simma (<https://apps.apple.com/us/app/simma/id1581388846>)

- **Role:** Front-end Engineer.
- **Competency(s):** React Native

Project Description:

- The Simma app provides you with a fast and smooth shopping experience from your favorite international stores and brands.
 - Constantly follow the latest fashion trends.
 - Shopping from international stores.
 - Shipping to your door at the lowest prices.
 - Track Your Orders.

PainC (<https://apps.apple.com/pk/app/painc/id1529447804>)

- **Role:** Front-end Engineer.
- **Competency(s):** React Native

Project Description:

- Worked on the development of a state-of-the-art pain management app to support people living with chronic pain and their treating healthcare providers to capture self-reported outcome measures. Improved front-end performance by eliminating performance bottlenecks.

DiversePro (<https://apps.apple.com/us/app/diversepro/id1603656508>)

- **Role:** Front-end Engineer.
- **Competency(s):** React Native

Project Description:

- With its social networking platform, DiversePro makes it easy for diverse communities and allies to share, learn, and connect with diverse lawyers who know the culture, language, and experience. DiversePro offers engaging multiple features to help the users to create their own story, their own Post, like having complete Instagram features. and also engage the users to share the post to other platforms and in app communities. Personalized profiles: create a profile, share what makes you unique, and connect with others, learn, and share.

TrueHelpers (<https://play.google.com/store/apps/details?id=com.techndevs.truehelpers>)

- **Role:** Front-end Engineer.
- **Competency(s):** React Native

Project Description:

- Truehelpers is a Q/A platform that encourage students and professionals to share their knowledge and support community to help others. Students and professional can visit to Truehelpers and ask question on any topic and subject other people in community will help them to find answer of that and give replies.
